Nitrogen Tire Inflation Kits

- 1. 452IN-175-WO Regulator
- 2. HQ14-012 Hose
- 3. TF7000 Inflator
- 4. CY20-580 20 cu. ft. cylinder
 - CY40-580 40 cu. ft. cylinder (available)

GKNT

Longer Tire Life

- Better Gas Mileage
- Less Tire Maintenance

GENTEC Nitrogen Tire Inflation Kits allow for easy, cost effective filling of automobile and truck tires with pure nitrogen. The kits are portable, easy to operate, and conforms to the specifications and requirements of UL, DOT, and OSHA.

Compressed Nitrogen Gas, a dry inert gas, allows tires to last longer, perform better, and function with a greater degree of reliability than tires inflated with standard compressed air. Its large-sized molecule helps with tire pressure retention and leads to more uniform tire wear and better gas mileage. Also, it has a low thermal expansion coefficient that minimizes heat damage from pressure changes.

The GENTEC Nitrogen Tire Inflation Kits include a 12" hose whip end, high pressure nitrogen regulator, dial pressure gauge with reset purge valve, and 12 ft. coiled hose. The kits are also available with 20 or 40 cu. ft. nitrogen cylinders in a steel carrying stand.
